

CAPTURE

COLLABORATIVE ASSESSMENT OF
PEDIATRIC TRANSVERSE MYELITIS:
UNDERSTAND, REVEAL, EDUCATE

A PATIENT-FOCUSED, INTERNET-BASED, OBSERVATIONAL RESEARCH STUDY ON PEDIATRIC TRANSVERSE MYELITIS (INCLUDING ACUTE FLACCID MYELITIS) IN NORTH AMERICA FUNDED BY THE PATIENT-CENTERED OUTCOMES RESEARCH INSTITUTE (PCORI).

Eligible volunteers must be:

- Diagnosed with Transverse Myelitis or Acute Flaccid Myelitis
- Between the ages of 0 – 18 (must have been 17 years at onset)
- Within 180 days (six months) of symptom onset

No travel is necessary. Participation includes online surveys by the child and/or parent/guardian at baseline, 3, 6, and 12-month intervals. Imaging records are also reviewed by the research team.

Contact Rebecca Whitney at 855-380-3330 ext 5, or via email at rwhitney@myelitis.org. You may also contact the nurse research coordinator, Tricia Plumb RN, MSN directly at 214-456-2464, or via email at patricia.plumb@utsouthwestern.edu
